

# Meraki *mini*

Certified organic, mild & gentle care

Meraki offers you a unique world of skin care products designed and developed in Denmark. The range is made in a creative environment, inspired by Scandinavian aesthetics and with love for nature's treasures.

The Meraki Mini range from Meraki has been created to provide parents with honest and safe options for their babies and children – without compromising on aesthetics. The Meraki Mini line is a range of gentle and safe products, and it is committed to the environment through its entire life cycle.

Each product has its own animal illustration on it to reflect the fun, spontaneous and playful nature of a child in an aesthetic way.

On the back of each care product, three certification labels can be found. These ensure that the Meraki Mini product is made with care and consideration.

The Blue Label from The Danish Asthma and Allergy Association ensures that the risk of allergy is minimised and the products are free from perfume.

The Nordic Swan Ecolabel is only given to products that meet some of the strictest environmental and health requirements in the world.

The Ecocert label is your guarantee for a certified organic product that meets strict rules for organic farming and environmentally friendly processes.

- Mild and gentle skincare free from perfume
- Suitable for children aged 0+
- Developed to care for the sensitive skin of babies and children
- Moisturising, nourishing and counteracts dehydrated skin
