E&OE: To the best of Victorian Bathrooms' knowledge, the information in this document is correct.

Arte Collection

Meaning the Italian translation of 'art', the Arte Collection is designed and manufactured in Italy.

Italy is famous for its impeccable style, and this tapware collection is no exception. Pronounced 'RT', which is coincidentally the same initials as Romain de Tiroff, the 'father of Art Deco', the design of this range features the glamour of the 1920's with its geometric and cubic influences whilst bringing it into an era of modernity with cleaner and more balanced lines, mixing form and function with elegance and glitz.

Made from solid brass, the range is available with either a unique cross head or lever design, completed with all chrome inserts and finishes, and made with modern mechanisms where all tap heads make use of a ¼ turn movement through internal ceramic discs.

Available with either the Arte cross handle or lever:

Arte cross handle

Arte lever

Bespoke Finishes

The Arte Collection is stocked in a chrome finish however is available upon request in a selection of bespoke finishes including aged brass, brushed brass, polished brass, brushed nickel, polished nickel and powder-coated black. Pricing and lead times will vary depending on the selected special finish.

Please refer to our brochure, 'Bespoke Finishes' for more information and speak with a sales consultant before ordering.

Bath Taps & Mixers

Arte Tap Heads

with quarter turn ceramic disc mechanisms

Bath pillar taps
