Britannia Collection

The Britannia Collection – a timeless range of tapware and showers that evokes a sense of comfort and nostalgia. A refined design that has evolved to be the best it can be – practical and elegant. Being well designed and affordably priced, this collection meets every need for traditional and modern classic interiors.

Victorian Bathrooms' reputation is built on a foundation of integrity, quality and passion. We have worked closely with our Italian tap manufacturer to create a vast collection specifically for the South African consumer. Made from the finest brass, the Britannia Collection is imported into South Africa in the chrome finish but customised bespoke finishes such as polished, brush and aged brass, or polished, brushed, and aged nickel, as well as powder coated matt black, are available on request (with an extended delivery time). In addition, the majority of the items (especially the components that are built into the wall) are manufactured from DZR brass, meeting the requirements of the local authorities.

The Britannia Collection is built to last – turning a simple task into a luxury experience. And with a comprehensive spares department offering full service and spares back-up, the longevity of this range will last for many years to come.

The Britannia Collection has the option of tap heads or levers as follows:

Please note that the pricing varies for the different tap head offerings.

**Traditional Cross Handle
White**

**Deluxe Lever
White**

**Deluxe Lever
Chrome**

**Traditional Cross Handle
Black**

**Deluxe Lever
Black**

Victorian Bathrooms include other specific high quality products from other manufacturers to supplement the existing Britannia Collection, whilst being complimentary in design, e.g. the St James Collection.

Britannia Concealed Manual Shower Mixers

When deciding on a shower configuration, it is important to note whether your plumbing will be concealed inside the wall or visible against the tiling.

Concealed shower mixers are designed for plumbing to be built within the wall.

Concealed Single Lever Shower Mixer

The backplate is available in two sizes, 80mm and 118mm diameters.

Shower plumbing to be concealed within the wall. Should it be required, an extension piece is available at an additional cost.

Britannia Shower Roses

Britannia shower roses

The Britannia shower roses are available in 3 sizes – 6", 8" and 12" – and are supplied with ball joints.

The antiscalic nipples enable any limescale build-up that may occur over time to be easily cleaned by wiping your finger across them. The 6" and 8" roses are fitted with 9 litre per minute aerators and the 12" rose with a 15 litre per minute aerator. It is imperative that the flow restrictor remain in the shower rose, especially if the water pressure exceeds 400 KPA / 4 Bar.
