Victorian Bathrooms

presents

The Kitchen Collection – Sink Mixers

In Victorian Bathrooms' continuous quest to find the best in classic bathroomware, kitchen products with quality and design unsurpassed by anything else have been discovered along the way. Synonymous with Victorian Bathrooms' overall style – classic, timeless, luxury – the Kitchen Collection holds a range of sink mixers that are timeless complements to any household.

Britannia

Designed and made in Italy, the Britannia range of sink mixers reflects a traditional style that is classic and clean. With modern mechanisms, all tap heads make use of a quarter-turn movement through internal ceramic discs. Britannia is our most economically-priced tapware range, offering outstanding quality for use in larger projects or for the more budget conscious.

Arte

Meaning the Italian translation of 'art', the Arte Collection is designed and manufactured in Italy. Pronounced 'RT', which is coincidentally the same initials as Romain de Tiroff, the 'father of Art Deco', the design of this range features the glamour of the 1920's with its geometric and cubic influences whilst bringing it into an era of modernity with cleaner and more balanced lines, mixing form and function with elegance and glitz.

Nicolazzi

The Nicolazzi range of Italian hand-finished tapware is traditionally styled to add charm to any kitchen. With a commitment to quality, these solid and sturdy pieces are created to reflect a beauty that is timeless. All Nicolazzi sink mixers are made from lead-free brass and compliant with international standards such as the Australian Watermark, the USA/Canada cUPC and Low Lead Plumbing Law. There is no release of nickel or zinc into the water. Completely non-toxic.

Belgravia

Displaying ultimate form and function, the Belgravia sink mixer is exceptionally crafted and hand polished. Produced from genuine brass castings, chrome plated and with ceramic levers, the taps are manufactured in Europe and operate from low water pressure.

Single Lever Sink Mixers

With its ergonomic lever, the single lever sink mixer allows for an effortless control of water temperature and volume.
